

## North Perimeter Road, Phase I, Boeing Campus Everett, Washington

---

The major access road through the Boeing Everett campus was realigned to accommodate construction of the 777x facility and associated parking. Osborn Pacific Group was responsible for the design of the streetscape for this ¾-mile project.

Work included maintaining the design intent of the campus master plan while incorporating low impact development strategies such as drought-tolerant vegetation. The new vegetation also had to be deer-proof and in the larger areas — provide restored habitat for birds and wildlife.

**Project:**  
*North Perimeter Road, Phase I*  
**Client:**  
*Boeing*  
**Location:**  
*Boeing Everett Campus, Everett, WA*  
**Date:**  
*2015*  
**Services:**  
*Landscape architecture*
