

# RV CAMPGROUNDS

Arizona, California, Illinois, Michigan, Missouri, Oregon, Tennessee, Texas, Washington, Mexico, British Columbia

As project planner for RV resort campgrounds ranging in size from 40 to 600 acres, Osborn Pacific Group performed on-site field surveys and prepared master site plans and detailed designs for private membership RV resorts and campgrounds. In addition to siting pull-through and back-in campsites, Osborn Pacific Group also coordinated with the owners to identify appropriate amenities for each site. These amenities included adult, teen and family centers; swimming pools and spas; children's play areas; tennis, sport, pickle ball, and basketball courts; horseshoe pits; shuffleboard; miniature golf; trails; picnic shelters; kitchens; amphitheaters; restrooms; and laundry facilities. Many of the projects included preparation of SEPA environmental checklists and impact statements and participating in public hearings.
