

SOUTH HILL PARK AND RIDE LOT

Puyallup, Washington

Project:
South Hill Park and Ride Lot
Client:
Sound Transit

Location:
Puyallup, Washington

Services:
Landscape planting design, irrigation design, construction documents, specifications, and cost estimate.

Osborn Pacific Group Inc. was responsible for the landscape architecture for this Sound Transit park and ride facility. Work included site planning for parking, bus bays with shelters, pedestrian walkways, restroom facilities, and landscaped areas. The landscaping was designed to provide buffers between the park and ride lot and adjacent property owners, to delineate vehicular and pedestrian circulation, and to provide a sense of scale and comfort to the pedestrian environment.

Working with an artist, the planting scheme within the parking lot was designed to be a “tree zoo” – a variety of trees that exhibit different growing characteristics accompanied with identifying name plaques.
